## **PRATT NOISE ISSUE UPDATE**

**December 22, 2014**

Dear Vista Ridge Neighbors,

Starting this week, we will begin moving the drilling rig off of the Pratt location. This activity is done during daylight hours and should take us about a week to complete. We are stopping all associated activity on location starting late afternoon on December 24 through the morning of December 26. We plan to have the majority of equipment, including sound walls, removed from location by early January.

As we previously committed, we are taking this time to find a solution to the noise issues we've encountered at the Pratt well site. We will share our plans with the Town and our neighbors before we reoccupy this location.

Currently we do not have an estimated timeline for reoccupying the Pratt or Waste Connections sites. As soon as we are confident of our schedule we'll share that as well.

Thank you for your continued feedback and your patience.

Encana
