Dear Neighbor,

We anticipate beginning drilling operations at the nearby Pratt location the week of November 10.

We take pride in maintaining safe, responsible operations and make every effort to minimize the impact our work has on our neighbors. At this location you'll see sound mitigation around the perimeter of the pad, we'll monitor mud and dust and mitigate it as needed, we'll adjust lights away from homes and maintain the approved access for this location.

For additional information about what to expect during this phase of our operations, please visit the Courtesy Notice that you may have received in the mail or that's posted on the Encana page on the [Town of Erie's website](#).

We anticipate wrapping up this phase of activity in March of next year.

For more information about these and other operations near you, visit the [oil and gas operations page](#) on the Town of Erie's website. You can also email us at CommunityRelationsUSA@encana.com or call Encana at 866-896-6371 with any questions you might have.

Thank you.
