Additional Information – Morgan Hill Site

December 12, 2014

Encana will submit permits to the Colorado Oil and Gas Conservation Commission (COGCC) in 30 days, for oil and gas operations at the Morgan Hill 7H-A168 location. Once the permits are reviewed for completeness and accepted for official review by the COGCC, you will have the opportunity to provide comments on this planned site, before any operations begin. This public comment period will remain open for 20 days. We will post an update on this page when that begins.

Visit <http://cogcc.state.co.us/> to check on the applications and see instructions on how to comment on a permit.
