Oil & Gas Notifications

Notice of Activity from Crestone Peak Resources

Crestone Peak Resources has notified the Town of Erie that they will have activity on five wells in and around Erie this week.

Those well sites are:

- Coal Creek C Unit 1
- Bailey 42-12
- Bailey 43-1
- Wheeler G Unit 1
- Lumry G Unit 1

Workers will be inserting a tool into the wellbores on these sites that will accurately map the well to its total depth. This information is important for Crestone to have during the planning and development of their approved locations in Erie.

During this activity, neighbors can expect to see worker pickup trucks and a slickline truck, which is about the size of a semi-truck, on the location. This activity will be done during the day and should take two-four hours to complete on each well.

Crestone recently acquired all of Encana's assets in this area.

If you have questions, please contact Crestone via email at CommunityRelations@CrestonePR.com or phone at 720-410-8537. You can also visit the [Crestone Peak Resources](#) page on the Town of Erie's Website.
