

December 9, 2016

Due to equipment availability and weather, activity at the Erie Champlin well site (just west of Colliers Boulevard and north of Erie Parkway) has taken longer than anticipated to complete. As neighbors have noticed, we are operating 24 hours a day right now to finish the remediation work and to shorten the amount time we are on location. We have sound walls set around the well site to help mitigate noise coming from location and we have shrouded the rig lights and adjusted them away from homes.

Thank you for your patience and feedback as we've worked through these delays. We have been working with the COGCC throughout our operations at this site.

We do anticipate being done with activity at this site the week of December 12.

Please contact Crestone at 720-410-8537 or CommunityRelations@Crestonepr.com with any questions.
