

UPDATE NOTICE: CRESTONE PEAK RESOURCES ERIE CHAMPLIN WELL SITE

December 20, 2016

Crestone Peak Resources encountered some unexpected delays in remediating the Erie Champlin well these last few weeks. They anticipate being done with 24/7 activity by end of day Wednesday, Dec. 21, moving to daylight only operations after that. Crestone will not be operating at the Erie Champlin location over the holiday weekend. All activity at this site should be complete by early January.

Crestone appreciates the feedback and comments received from neighbors and their patience as they worked to properly remediate this well. If you have any questions you can contact Crestone at communityrelations@crestonepr.com or 720-410-8537.
