

NOTICE: MUDTRACKING FROM CRESTONE'S ERIE CHAMPLIN WELL SITE

December 21, 2016

Crestone Peak Resources began moving equipment off of the Erie Champlin well site late yesterday afternoon. Unfortunately, much of the equipment tracked mud onto Colliers Boulevard in the process. Crestone deployed street sweepers and water trucks to clean the roads this morning. They are working with the Town of Erie to ensure the mud is cleaned up and the roads are put back to the condition they were before activity started.

Crestone appreciates the feedback and comments received from neighbors regarding this issue. If you have any questions you can contact Crestone at communityrelations@crestonepr.com or 720-410-8537.
