## **NOTICE OF ACTIVITY STARTING AT WASTE CONNECTIONS AND PRATT LOCATIONS**

Crestone Peak Resources anticipates beginning drilling activity at the Waste Connections and Pratt locations in March. Next week, neighbors near each location will receive a letter in the mail with information about a community meeting Crestone is holding in February to discuss plans for each site.

Over the next few weeks, neighbors will start to see prep working being conducted near and at both the Waste Connections and Pratt locations. A lot of work must be done in advance of sound walls being installed and the rig moving in by mid-March.

Specifically, Crestone will begin activity to connect the gathering lines and electric power from the south side of the Pratt location, west to the Waste Connections pad. Heavy equipment will be used to lay the lines in the current right-of-way. We will also be prepping both well pads and the temporary completions area, including grading the sites, installing storm water controls, checking conductors and current equipment already installed on each location, sound monitoring and more.

All work will be done during the day and may include some weekends. If you have any questions regarding this activity, please connect with Crestone at 720-410-8537 or [communityrelations@crestonepr.com](mailto:communityrelations@crestonepr.com).
