It is Extraction's goal to be the safest and most responsible operator in the D.J. Basin.

370 17th Street, Suite 5300
Denver, CO 80202

Dear Residents,

We at Extraction Oil & Gas are contacting you to let you know that we are beginning the initial development phase at the Coyote facility, the location of which is outlined on the reverse side of this card. To mitigate impacts on the community, prior to initiation of drilling operations, you will see the installation of sound walls, also pictured on the reverse side of this card. The sound walls are designed to decrease any noise and ambient light that might result from operations. During this time, due to increased activity in the area, you may notice additional trucks on the road. However, we will try to avoid peak traffic hours for large loads. This portion of the operations phase is expected to last approximately four to five weeks, with completions operations anticipated in or around early April 2018.

When the drilling phase begins, the operations require 24/7 activity during which we will continuously monitor sound. Please reach out to us with any reports of heightened noise so that we can identify and make appropriate adjustments or mitigations. **If you have any questions about these operations, please contact us via our drilling hotline at 720-281-5983.**

We thank you for your patience throughout this process to responsibly develop the energy resources we all use each day.

(See reverse for more details)
