Hello,

We would like to inform you that we will soon permanently remove an oil and natural gas location in your neighborhood. We will continue plugging and abandoning the Tallgrass 33-17 location after obtaining equipment suggested by the Colorado Oil and Gas Conservation Commission (COGCC). Please see the map on the reverse side for reference.

The first step – the plug and abandonment phase – will take place **in the next few weeks**, and is expected to take approximately eight to ten weeks to complete. An emission control device (ECD) will be used during our work on each well, with seven wells on location. This device can be loud when in use. Work will occur Monday through Saturday, during daylight hours. You may notice a slight increase in noise and traffic during this process.

The location will be fenced off and have night watch on location. You will see a work-over rig, slick line trucks as well as other heavy equipment onsite during the course of work.

Thank you for your patience while we perform this work. If you have any questions or wish to report an issue related to our operation, please contact us via the Anadarko Colorado Response Line at **866.248.9577** or **AnadarkoColorado@anadarko.com**.

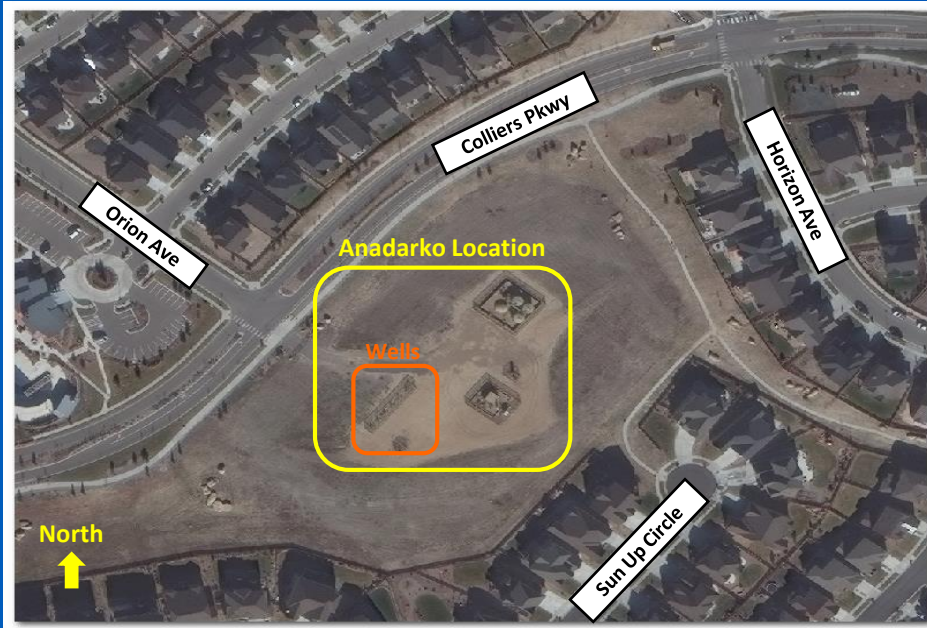

If you contact us, please reference this activity by the following name:

Tallgrass 33-17 P&A

 *See reverse side for more details*

- Plug and abandonment is scheduled to resume **in the next few weeks** and will last approximately 8-10 weeks
- You will see a work over rig, cement and water trucks, an ECD (Emission Control Device) and other heavy equipment onsite
- This procedure is regulated by the Colorado Oil and Gas Conservation Commission (COGCC)
- When you contact us, please reference this activity by the following name: **Tallgrass 33-17 P&A**
