Hello –

We are writing today to provide you with an update about the Commons 28-19 well location in your community. Please see map on the reverse side for reference. Previously, you may have received communication about future maintenance operations to be conducted at this location. However, after further review we have reached the decision to permanently retire the seven wells on this location and remove the associated equipment.

All of the wells on this location are currently safely shut-in, meaning they are not producing oil and natural gas.

We want to respect the community and the summer activities that take place at the nearby park. We recognize that the well retirement process, also referred to as plug and abandonment or P&A, can be disruptive. As such, we plan to schedule the retirement of these wells to take place when the weather cools down.

We will be sure to notify you when the retirement operation is scheduled. In the meantime, you may see Anadarko representatives out on-site checking in on the wells.

If you have any questions or wish to report an issue, don't hesitate to contact us via the Anadarko Colorado Response Line at **866.248.9577** or **AnadarkoColorado@anadarko.com**.

When you contact us, please reference this activity by the following name:
