

## **GAS LOG AND GAS FIREPLACES**

### **PERMITS ARE REQUIRED FOR GAS LOG, GAS FIREPLACE AND GAS FIRE PIT INSTALLATION**

#### **Notes:**

- Must submit a plot plan with the permit application showing the proposed location.
- Permit must be reviewed by the Planning Division and cannot be issued over-the-counter.

#### **Guidelines:**

- Must comply with the provisions of the 2006 International Fuel Gas Code
- Gas appliances must be approved by a recognized testing lab
- Gas pipe must be properly sized and approved for the intended use
- Flex connectors installed inside of firebox must be listed
- Installation of a manufactured chimney cap is required
- Installation of glass doors are recommended

#### **Inspection Checklist:**

- 10 pound air test required for 30 minutes (gauge supplied by owner/contractor)
- Shut off must be readily accessible and within four feet of firebox
- Combustion air may be required
- Flue size per manufacturer's specs
- Gas pipe installed outdoors must be painted
